Plan Overview

The Stable Value Account can be used in a Traditional IRA, Roth IRA, or Non-Qualified Group Annuity. The SVA provides stable growth with very little risk. It's ideal for investors seeking to preserve their principal investment, while growing their assets with a competitive interest rate.

Due to the construction of the account, the funds grow tax-deferred. This allows the assets to grow faster than taxable assets because the earnings are not diminished each year by taxes.

Three Account Type Choices

Traditional IRA: Contributions may be tax deductible for some investors (based on income levels). Investments are permitted up to the IRS annual maximum of \$5,000, or \$6,000 for investors age 50 or older. Investors must have an earned income to contribute to an IRA*.

Roth IRA: Contributions are not tax-deductible. Investors will benefit from tax-free growth. Upon retirement, qualified distributions from a Roth IRA will be tax-free. Investors can contribute up to the IRS annual maximum of \$5,000, or \$6,000 for investors age 50 or older. Investors must have earned income and must meet income eligibility limits to contribute to a Roth IRA*.

Non-Qualified Group Annuity: Contributions are not tax-deductible. Investors can contribute without limit, and is not dependent upon earned income. Interest grows tax-deferred.

**See the GEBA Contribution Form for income limits.*
